California

# Fire Life Safety Inspection & Monitoring

**Fire Alarm.** We install and maintain fire alarm systems for thousands of Southern California residents. In addition to UL Listed monitor stations, RedRock provides sprinkler and extinguisher services via established professional partnerships.

**Area Of Refuge.** We test and inspect field devices (call box, mountings, etc.) and signal test for communication clarity and verification of signal receipt. 24 hour monitoring.

*"We work with courtesy,  
respect and humility."*

## Talk To Our Team!

Call (866) 570-6919 To Learn More

Our certified technicians are backed by field-trained office staff with decades experience troubleshooting (and resolving) any problem they encounter.

**Emergency Responder Radio Coverage Systems.** We are experts in the implementation of mandated Emergency Responder Radio Coverage (ERRCS) and Distributed Antenna Systems (DAS). Per California Fire Code, we employ registered FCC Technicians to conduct all testing and provide the necessary documentation to remain in compliance.

## The RedRock Difference

**Service Trade.** Real time updates delivered to your mobile devices during service. Records/photos of all completed tasks archived online.

**Building Reports.** Track compliance status and service schedules from our central repository to gain visibility and gather the intelligence needed for improved decision making and budgeting.
